

Internet Bookstore: Requirements

1. The **bookstore** will be web based initially.
2. The bookstore must be able to sell **books**, with **orders** accepted over the **Internet**.
3. The user must be able to add books into an online **order**. (the user must add the quantity of each book).
 - a. Similarly, the user must be able to remove **items** from the shopping cart.
4. The user must be able to maintain **wish lists** of books that he or she wants to purchase later.
5. The user must be able to cancel orders before they've shipped.
6. The user must be able to pay by **credit card** or **purchase order**.
7. It must be possible for the user to return books.
8. The user must be able to create a **customer account**, so that the system remembers the user's details (name, address, credit card details) at login.
9. The user must be able to search for books by various **search methods**—**title**, **author**, **keyword**, or **category**—and then view the **books' details**.
10. It must be possible for the user to post reviews of favorite books; the **review comments** should appear on the book details screen. The review should include a **customer rating** (1–5).
 - a. **Book reviews** must be moderated—that is, checked and “OK'd” by a member of staff before they're published on the website.
 - b. Longer reviews should be truncated on the book details screen; the **customer** may click to view the full review on a separate page.
